

*Health is more than healthcare
or the absence of illness!*

Housing, good paying jobs, and access to transportation are all examples of things that impact a person's ability to be healthy.

What is a Community Health Assessment?

Local health departments are required to complete a Community Health Assessment (CHA) every five years. It is a process to help select the most important things impacting the health of a local community.

Why does it matter?

The ultimate goal of a Community Health Assessment is to spark change in a community for the better! Once top priorities are identified, the community comes together to figure out solutions and next steps.

The CHA steering committee wanted this process to focus on gathering a variety of viewpoints and experiences from the residents of Juneau County. The survey questions were updated to get people to think differently about what health means to a community.
