If you're unable to access one of the permanent drop box locations, follow these tips from the FDA.

- Follow specific disposal instructions on the packaging that accompanies your medications. Do not flush down the toilet or sink unless it specifically states the medication is safe to do so.
- If there is no disposal information available, follow these steps:
 - Remove the medication from its container. Black-out personal information from the original container and dispose of the container in your trash.
 - Mix the medication with an undesirable substance such as dirt, kitty litter, or coffee grounds. This makes the medication less likely to be accidentally ingested by a child or pet or scavenged by someone who would like to use or sell it.
 - Place the mixture in a sealed bag or can and place in the trash.
